Remote Computer *(computer which will have .exe to be launched remotely):*

1. Launch Powershell by right clicking and open as admin.
2. In powershell (as administrator), `winrm quickconfig`
3. In powershell (as administrator), `winrm set winrm/config/client`
   `'@{TrustedHosts="PCNAME"}'`
4. In powershell (as administrator), `Set-ExecutionPolicy Unrestricted`
5. Make sure your exe path looks like this:
   `C:/Jenkins/workspace/FL_Forma_Master/Changelist/WindowsNoEditor/Forma.exe`

Controller Computer *(computer from which you will run commands and powershell ISE):*

1. Create a new file called `remote.ps1`
2. Copy and paste the following script in this text file below, save and hit the green play sign to compile.
3. Now download PSTools.
4. Once downloaded make a folder called 'PSTools' in the 'Jenkins' directory.
5. Now go to the PSTools.zip folder you just downloaded and extract is to the 'PSTools' folder you just created.
6. Now you can open up your *remote.ps1* file in *Powershell ISE.*
7. To open Forma.exe on all the computers type *Open-Players* and hit Enter in the command line of Powershell ISE.
8. To close Forma.exe on all the computers type *Close-Players* and hit Enter in the command line of Powershell ISE.
